ABOUT ME

A results-driven Data Analytics Specialist with a Bachelor's degree in Informatics Technology. Experienced in analyzing large and complex datasets, developing dashboards (Tableau, Power BI), and delivering actionable insights to drive strategic business decisions. Proven ability in data migration and optimizing data systems on platforms like Amazon Redshift and Google Cloud. With valuable experience in banking/financial services and plantation sectors, I bring a strong focus on data accuracy, strong analytical thinking, and creating solutions using tools like SQL and Power BI. Fluent in English and native in Indonesian.

I enjoy applying statistical analysis and basic machine learning to uncover trends and support data-driven strategies. I'm fluent in English and Bahasa Indonesia, and I love bridging the gap between technical solutions and business goals. I thrive in fast-moving environments, love learning new tools, and get genuinely excited when data can make someone's day easier or even help predict what comes next.

EDUCATION

Telkom University *Bandung, Indonesia*

Degree*: Master of Informatics, Concentration in Data Science (2025-Present)*

- Completed a research project on large-scale chemical data integration, developing an optimized indexing-based architecture that reduced processing time from months to hours.

State Polytechnic of Malang *Malang, Indonesia*

Degree*: Bachelor of Informatics Technology (2017-2021)*

- Major in Informatics Engineering
- Finished working on a thesis with the title "*Identification of Hate Speech on TikTok Using Classification Method*" that mainly discusses about how big the percentage of hate speech on TikTok using the naive bayes classifier method.

WORKING EXPERIENCE

Wilmar Consultancy Services *February 2023 - Present*

Business Intelligence Specialist Sector: Plantation

- Perform data analysis to identify trends, patterns, and insights that inform strategic decision-making
- Design, develop, and maintain Business Intelligence solutions, including reports and dashboards
- Utilize BI tools such as Tableau, Power BI, SAP BW, and SAP Analytic Tools.
- Communicate with clients to ensure data accuracy, integrity, and consistency, and ensure that the solutions provided are appropriate and on target.
- Gather and analyze business requirements to understand data needs and objectives.
- Successfully completed 2 data migration projects on time

PT Simian Technologies *May 2022 – February 2023*

Data Engineer Sector: Banking (Financial Services)

- Supported Bank Reporting for Bank Indonesia (Antasena), demonstrating experience in the Financial Services/Banking sector (2 Clients/Banks).
- Performed data analysis for clients and offered analytical procedures about the process of IFRS 9's calculation.
- Supported the implementation of IFRS 9/PSAK 71 to claim CKPN rate for user's decision in risk management (1 Client/Bank)
- Developed the ETL process for implementing Banking Business Process Data using ETL tools Pentaho.

Digtive Global Media *January 2020 - Feb 2020*

Internship – Digital Marketing

- Learned basic skills in Digital Marketing such as Facebook ads, Google Ads, CRM, SEO, Google Analytics, and Facebook for Business.

CERTIFICATION

SAP Certified Associate - Data Engineer - Data Fabric *Mar 2025- Mar 2026*
SAP

- This certification verifies that you possess the core skills required in the profile of modeling, data acquisition, and query design with SAP BW/4HANA and SAP Datasphere and proves that you have an overall understanding and in-depth technical skills to participate as a member of a project team in a mentored role.

SAP Certified Specialist - SAP S/4HANA Cloud Private Edition *Dec 2024 - Dec 2025*
SAP

- This certification exam validates that the candidate possesses the core knowledge required to support SAP S/4HANA Cloud Private Edition. It is designed for the Implementation Consultant & Project Manager who needs to prove that he/she has an overall understanding and in-depth skills of SAP S/4HANA Cloud Private Edition and can participate in his/her role as a member of an implementation project

Python (Basic) Certificate *February 2023*
HackerRank

- Finish Course & Test assessment about Basic Python

Learning Python for Data Analysis and Visualization *October 2022*
Udemy

- Finish Course & Test assessment about Python for Data Analysis and Visualization

ADDITIONAL

Technical Skills	: Python, Microsoft, PostgreSQL, MySQL, Tableau, Power BI, ETL, Pentaho, AWS Redshift, SAP Analytics Tools, ProblemSolving
Language	: English Fluent, Native in Indonesia
Activities	: Basketball
Interests	: Consulting, Data Analytics & Data Visualization, Machine Learning

PROJECT

Large-Scale Cheminformatics Data Integration *September 2025 – December 2025*
Research Project – Data Scientist

- Developed a high-quality, multi-source chemical dataset by integrating 176M+ compounds from PubChem, ChEMBL, and eMolecules for machine learning applications**.**
- Designed an optimized data pipeline achieving 740× performance improvement, enabling rapid iteration on dataset selection and validation.
- Discovered and quantified hash collisions in InChIKey identifiers, identifying hidden data quality risks in large-scale scientific datasets.
- Migrated the pipeline to collision-free molecular identifiers, ensuring structural uniqueness and reliable ML training data**.**
- Delivered a validated dataset of 435K+ compounds, suitable for downstream property prediction and modeling tasks**.**
- Journal Publication : https://arxiv.org/abs/2601.18921

Assessment Data Modernization – Executive Advisory Support *December 2025 – February 2026*
PT Wijaya Karya (Persero) Tbk - Transformation & IT Division

- Contributed to a strategic Data Modernization Assessment for enterprise analytics platforms (SAP BW/4HANA, SAP BPC, PostgreSQL DWH, Talend, Power BI) supporting management and executive reporting.
- Performed detailed analysis of data architecture, ETL/ELT pipelines, governance, security, infrastructure, and usage patterns, translating technical findings into business-relevant insights.
- Supported identification of key pain points, architectural bottlenecks, and technical debt impacting system performance, scalability, and maintainability.
- Assisted in developing a platform-agnostic modernization blueprint and roadmap, including baseline vs to-be capability assessment, quick wins, and migration considerations..
- Contributed to executive-facing materials and recommendations used to inform board-level discussions on data governance maturity and digital transformation readiness.

Mini Project for PoC SAP Business Warehouse & SAP BOBJ *August 2025 – Februari 2026*

PT Steel Pipe Industry of Indonesia Tbk – IT Division

- Contributed to a Proof of Concept (PoC) implementation using SAP Business Warehouse (BW/4HANA) and SAP BusinessObjects (BOBJ) to support analytical reporting and management decision-making.
- Designed and reviewed BW data models (InfoProviders, queries, and semantic layers) to ensure accurate, consistent, and performant data consumption in SAP BOBJ.
- Developed and validated SAP BOBJ reports (e.g., Web Intelligence / Analysis) aligned with business requirements and key management KPIs.
- Supported data extraction, transformation, and integration processes within SAP BW, ensuring data quality, reconciliation, and traceability from source systems.
- Assisted in preparing PoC findings and recommendations for management, highlighting system feasibility, reporting capabilities, and scalability consideration.

Wilmar AI POC – "Material IQ" *November 2025 – Present*

Wilmar Group

- Built an AI-driven "Material IQ" solution on SAP Business Technology Platform to automate material identification and L1/L2/L3 classification for mechanical parts using images and short text queries.
- Modelled more than 33,000 material-level entities in SAP HANA Cloud as a materials Knowledge Graph, including categories, brands, manufacturers, and enriched attribute descriptions for search and reasoning.
- Implemented multi-search strategies (exact ID lookup, fuzzy text search, dimension and category matching) and achieved about 90% accuracy on the first 20 test images and 80% on the next 30 images.
- Demonstrated business impact by estimating a 30–40% productivity improvement for business users on material-code–related enquiries and a strong ROI from reducing manual lookup and back-and-forth clarification.

SAP Analytics Cloud Migration Data Source *October 2024 – December 2024*

IOI Group

- Enhance analytics capabilities and streamline SAP Analytics Cloud (SAC) data processing.
- Ensure seamless scaling to accommodate growing data volumes and increasing user demand
- Execute the migration with minimal disruption to ongoing business operations.
- Transform and align data structures to integrate seamlessly with Google Cloud Platform (GCP)
- Recreate and validate existing dashboards in SAC, ensuring accuracy and consistency post-migration.
- Migrate SAC environment and data from on-premise to Google Cloud for improved performance and accessibility

Plantation Migration Datawarehouse *December 2023 – July 2024*

Wilmar Plantation

- Achieve faster query performance and reporting capabilities.
- Enable easy scaling to accommodate growing data volumes without significant performance degradation.
- Execute the migration with minimal disruption to ongoing business operations.
- Transform data as needed to match the schema and data types in Amazon Redshift.
- Recreate and Recheck existing dashboards in Tableau. Total 17 Dashboard & 6 Datasource (Mature Production & Costing) + Hectarage For PPI Dashboard
- Migrate Datawarehouse from SAP to Amazon Redshift.

Internet of Things Project *August 2019*

Monitoring Fermentation

- A project based on a microcontroller and an Android device to monitor temperature and humidity during the fermentation process. In this case study, the black agar fermentation process is used as the object of project development.
- Journal Publication : https://journal.unnes.ac.id/sju/edukom/article/view/36151
